

# MODULAR BULLET TRAP

The Ballistic Steel Modular Trap offers an entirely new concept in steel bullet traps that allows rifle ammunition to be used on a narrow vertical bullet-trap.

## Key Features

- Depth less than 0.3m!
- Suitable for ammunition up to 7.72/5.56
- No mechanical parts, no media (rubber) to be exchanged
- No bolting or welding required
- All parts slot together, no special tools required
- Minimal maintenance requirement
- Trap formed from modular components less than 40kg each, most less than 25kg
- All parts precision laser cut

## Optional Features

- Modular ventilation connection to existing vent system

## Sizes

- Modular construction: The minimum width of 610mm can be expanded in steps of 595mm with no limit to total length.
- Height 1220mm or 1980mm (other heights available by special order).
