Exceeding the training needs of **specialist military and law enforcement** organisations around the world

Design and specialist fit out of **customised ranges and training facilities**

Project management from **design** through to construction, operation and **maintenance** and support

TRAINING SOLUTIONS

World-class expertise in the design and specialist fit-out of training facilities, turnkey solutions and customised ranges for specialist military and law enforcement organisations around the world.

PROFESSIONAL SPECIALIST TEAM

Our specialist team of range designers, architects, project managers, engineers and former end-users understand the environment and issues that affect our clients.

We work closely with the end-users to carefully analyse their training needs in order to design and deliver effective, leading-edge training solutions.

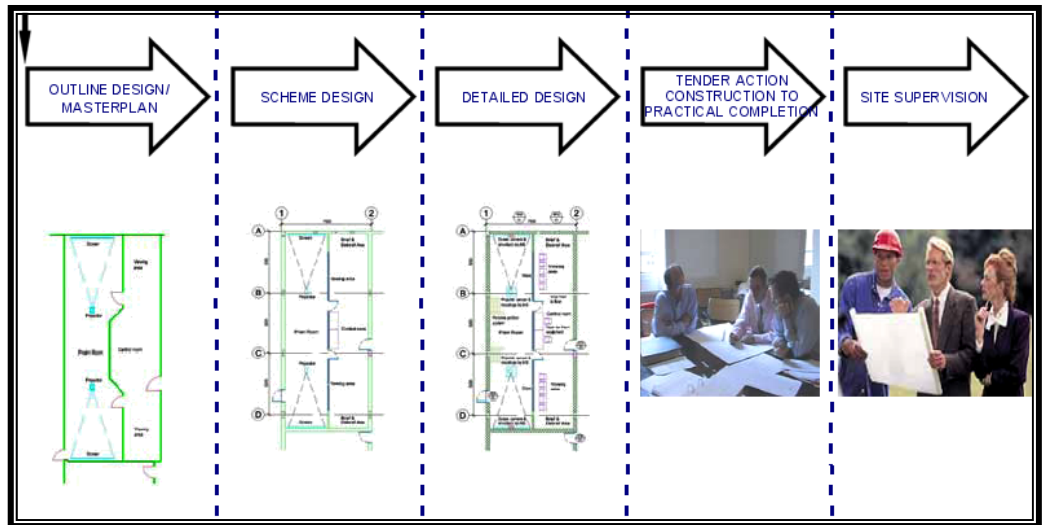

AS REAL AS IT GETS

For ultimate training realism, AIS combines its design expertise with judgmental training solutions using its video-based PRISim® training system.

The PRISim® family of simulators includes single and multi-screen systems, offering marksmanship, judgmental, dueling and sky marshall training, using live or laser fire weapons and less-lethal options.

TRAINING FACILITIES

RANGE DESIGN TO SPECIALIST FITOUT
